MEETINGS

The Annual General Meeting, the Meeting of Arbitrators and the Annual Dinner were held on 20th of April 2017.

The Council met on 14 February, 20 April, 13 September and 16 November.

REPRESENTATION WITHIN FOSFA

In the FOSFA Council Mr. R. van der Graaf acted as NOFOTA representative.

During 2017, the following members served on the Section Committees of FOSFA:

Oil Seeds Section	-	D. Stregels
Oils and Fats Section	-	A.C. Keemink

On behalf of NOFOTA:

- F. Out serves on the Technical Committee of FOSFA.
- L. Margaka represents NOFOTA in the Contract Committee of FOSFA.
- S.M. Kosorog acts as NOFOTA representative in the Arbitration and Appeal Committee of FOSFA.

FINANCIAL COMMITTEE

The Financial Committee for 2017 consisted of E. Berkelaar and J. van Zijst.

ARBITRATION

In 2017 the Committee of Appointment for the Oils, Fats and Allied Products Division consisted of:

G. Neureiter	(Chairman)
E. Schimmel	(member)
A.C. Keemink	(member)

The Committee of Appointment of the Groundnuts Division consisted in 2017 of:

J.P. van Velzen	(member)
P.C. Stienen	(member)

The Committee of Appointment of the Meat Division consisted in 2017 of:

C. Wendt
T.D. van der Ploeg

Attached to this report are listed:

- the latest list of arbitrators of the Oils, Fats and Allied Products Division including the Meat Division;
- the latest list of appeal arbitrators, drawn up by the Committee of Appointment for the Oils, Fats and Allied Products Division;
- the latest list of arbitrators and appealarbitrators of the Groundnuts Division.

CONTRACT COMMITTEE

During 2017 the Contract Committee studied the matter of electronic signatures on NOFOTA contracts and started the preparations of a NTR seminar to be held in 2018.

In 2017 the Contract Committee consisted of:

Members

L. Margaka	(Chairman, industry)
L. Aranov (replaced during 2017 by R. van Kempen)	(trade)
<i>Vacancy</i>	(trade)
C. Huurman	(industry)
J. Postema	(brokers)
S. Buisman	(consumers)
W. Grooss	(non-food)
J. van der Veerdonk	(Vice-Chairman, consumers)
W. Tang (left during 2017 and replaced by M. Sauer)	(industry)
H.A.A. Maduro	(representative tankstorage companies)
K. Knegt	(representative superintendent companies)
E. Veenstra	(representative Ucogras)
C. Buchholz	(agenda member GROFOR)

During the year 2017 the Contract Committee met on the 11th of May and the 7th of November.

LIST OF CONTRACTS AND ARBITRATIONS CLAUSES

A summary of all contracts issued by the Association is listed in the annex to this report.

TECHNICAL COMMITTEE

The Technical Committee further organized various audits for the recognition of tankstorage companies, superintendent companies and laboratories, according the 2017 audit scheme.

The latest NOFOTA-standards of analysis are annexed to this report.

The Technical Committee consisted in 2017 of:

F. Out (left during 2017, vacancy)	(Chairman)
J. Meijdam	(Vice-Chairman)
T. Eigenraam	(member)
D. Lippens	(member)
D. el Boudouhi	(member)
R. van Kempen (left during 2017, vacancy)	(trade)
A. Overmars	(member)
J. Hancock (retired and temporarily replaced by S. Logan)	(representative FOSFA)
A. Van Veen	(member)
R. van Gelder	(member)
A. Gario	(member)

B(technical/laboratory)-members

Ph. Bastijns	(laboratories)
M.H.F. Verhoeff	(laboratories)
A.P.M. Janssens	(laboratories)
H. Janssens	(laboratories)
M. Bruggeman	(laboratories)
J.N. van der Moolen	(laboratories)
R. Flokstra	(superintendents)

The criteria for recognized tankstorage companies became effective in 1997 and were adjusted in the Trading Rules by end 2015. A copy of the current version is attached to this report. Based on these criteria 9 tankstorage companies have a recognition in 2017. A list of the recognized tankstorage companies as per January 2018 is annexed to this report.

The criteria for recognized superintendent companies became effective in 1997. A copy of the current criteria is attached to this report. Based on these criteria 10 superintendent companies have been recognized by NOFOTA. A list of the recognized superintendent companies as per January 2018 is annexed to this report.

The list of the recognized laboratories as per January 2018 is annexed to this report.

The Technical Committee did not meet in 2017.

COOPERATION WITH KINDRED ASSOCIATIONS

The cooperation with our kindred associations, FOSFA, Associazione Granaria di Milano, GROFOR and UCOGRAS, continued. As far as possible the President of NOFOTA has attended the Council meetings of FOSFA International. Furthermore, we have accepted invitations to attend the annual dinners of the various associations.

GUIDELINES FOR THE FORMATION OF THE COUNCIL

1. In case the Council consists of 10 members the following categories should preferably be represented:

shippers	-	1
dealers	-	1
brokers	-	1
industry crush/refining	-	2
industry consumer	-	1
industry tropical oils/refiners	-	1
industry oleochemical/bio diesel	-	1
meat trade	-	1
groundnut division	-	1

2. Kindred Associations, being a member-A, may appoint their President to the Council, after obtaining prior approval of the Council.
3. Members of the Council must resign after a period of 8 years and may only be re-elected after a period of 2 years. For members of the Executive Council, the election period terminates after a full service.
4. Preferably, the President will be elected for a period of 2 years alternating from the list of industrial members and other categories with the exception of those mentioned under 2.
5. Preferably, the Vice-President will be elected for 2 years and directly succeed the President for the subsequent 2 years.
6. The outgoing President will preferably be nominated as 3rd member of the Executive Council for 2 years.
7. Council members who, for any reason, resign during their appointment, may propose a successor from the same category. The elected successor starts a new two years election period with a maximum of 8 years.

ORDER OF ROTATION OF THE COUNCIL

April 2018	E. Schimmel	re-eligible
April 2019	A. Keemink	re-eligible
	R. van der Graaf	re-eligible
	A. Toorman	re-eligible
	D. Stregels	re-eligible
	C. Sasburg	re-eligible
	S. Oudshoorn	re-eligible
	L. Dorrestein	re-eligible
	J.J.J. Aalberts	re-eligible
April 2020	E. Schimmel	not re-eligible
April 2021	A. Keemink	re-eligible
	D. Stregels	not re-eligible
	R. van der Graaf	re-eligible
	A. Toorman	re-eligible
	S. Oudshoorn	re-eligible
	L. Dorrestein	re-eligible
	J.J.J Aalberts	re-eligible
April 2022	<i>Vacancy</i>	re-eligible
April 2023	A. Keemink	re-eligible
	R. van der Graaf	not re-eligible
	A. Toorman	re-eligible
	D. Stregels	re-eligible
	S. Oudshoorn	re-eligible
	L. Dorrestein	re-eligible
	J.J.J. Aalberts	re-eligible
April 2024		

** There is a vacancy in 2018 for the seat of the brokers. With the AGM of 12 April Mr. Rekić will be proposed to fill the seat.*

GUIDELINES FOR QUALIFICATION AS (APPEAL) ARBITRATOR

1. Being active in the trade/industry.
2. Being minimum 30 years of age.
3. Having at least 8 years of experience in a qualified position.
4. Being a member or being employed by a member, or having been appointed by a member-A, or having been coopted by the Council.
5. Retirement as arbitrator three years after retirement from the trade/industry or at 65, whichever is the earlier.
6. After having been arbitrator in three arbitrations, an arbitrator can become an appeal arbitrator too.
7. Prospective arbitrators will first follow at least one arbitration as an observer.

LIST OF ARBITRAL AWARDS 2017

In the year under review 4 arbitration proceedings were applied for and in all cases a foreign party was concerned. Two arbitrations concerned an appeal arbitration and in one case the arbitration was withdrawn before the hearing and in one case after the arbitrators commenced their work.

During 2017, one arbitral award was issued. One arbitration from 2017 will be awarded in 2018.

OILS, FATS AND ALLIED PRODUCTS DIVISION

LIST OF ARBITRATORS AS PER JANUARY 2018

Arbitrators with an "M" behind their names are exclusively or also casings and/or meat experts, arbitrators with an "A" are also appeal arbitrator.

CRITERIA FOR A NOFOTA RECOGNIZED TANKSTORAGE COMPANY PER JANUARY 2018

Independence

1. The tank storage company shall not be engaged in any way in the trade of products typical the domain of NOFOTA and guarantees to operate fully independently from any other company in fulfilling its obligations under the NOFOTA Trading Rules.

Financial situation

2. The tank storage company's warrants, delivery orders and approved releases shall be those reproduced in the NOFOTA Trading Rules, latest edition. Its warrants and delivery orders shall be acceptable to a first class commercial bank as negotiable documents.

General conditions/Insurance

3. All activities of the tank storage company shall be subject to its general conditions valid on the date of the activity and deposited either with the relevant District Court or with the relevant Chamber of Commerce.
4. The tank storage company shall cover its liability insurance with first class underwriters as appropriate to the services performed.

Administration

5. The tank storage company shall be equipped to render the contractual administrative assistance to the trade as provided in the current edition of the NOFOTA Trading Rules. This includes the availability of an administrative batch tracking and tracing system enabling its principals and cargo-owners/-receivers to retrieve the full history of their cargoes from the moment these were brought under the custody of the tank storage company.
6. The tank storage company shall have facilities to allow for administrative work in connection with requirements from fiscal authorities, including financial security with those authorities.

Operational/technical

7. All materials and equipment (tanks, lines, pipes, pumps and valves, including sampling apparatus etc.) shall be suitable for the safe storage and handling of the product in accordance with the "Hygienecode voor op- en overslag van eetbare oliën en vetten" (Hygiene code for rage and handling of edible oils and fats), latest version VOTOB, or equivalent for those installations outside The Netherlands, applicable on the date of the activity.

- 7a. The previous cargoes in the tanks, lines and pump systems used for storage and handling of the oils at the tank storage company shall have been a product in accordance with the E.U. Commission regulation 579/2014 or any successive Directive in force at the time of the actual storage of the goods; all materials and equipment (tanks, lines, pipes, pumps and valves, including sampling apparatus etc.) used for storage and handling of other products shall be completely separated.
8. Tanks shall be equipped in such a way that they can be cleaned properly and that, if required, the product can be heated adequately by a proper temperature control system.
9. Technical equipment and operational procedures shall be such as to preserve the good merchantable quality of the product and to prevent contamination. Thermal heating oils shall not be used.
10. The tank storage company shall have available officially gauged/calibrated facilities for establishing quantity and shall offer adequate sampling facilities.

Certification

11. The tank storage company shall be certified for its operations in accordance with ISO 9001 in combination with HACCP or ISO 9001 in combination with ISO22000. This implies that the tank storage company shall operate with fully qualified staff and/or contractors at the highest standard customary in the country of operation and provide structural training facilities to its staff members for continuous improvement of its level of service and operations.

Application/duration/extension

12. A tank storage company applying for NOFOTA recognition shall be a member of the Association.
- 12a. A NOFOTA recognition shall be subject to an audit by a committee (excluding representatives of the tank storage companies) to be appointed by the NOFOTA Technical committee and will be granted recognition upon proposal of the Technical committee by the NOFOTA Council for a 3 year period.
- 12b. If prior to the end of the third respectively each following year no new audit is deemed necessary by the NOFOTA Technical committee, they will propose to the NOFOTA Council to automatically extend the recognition for another year. The NOFOTA Council will decide upon this proposal.
- 12c. The recognition may be withdrawn at any time by the NOFOTA Council at its discretion. The recognition remains in place for all parcels stored prior to the date of withdrawal. Parcels stored after the withdrawal has been published to the members are no longer subject to recognition.

Liability

Any liability of NOFOTA for or resulting from the (non-) recognition of a tank storage company is excluded.

RECOGNIZED TANKSTORAGE COMPANIES AS PER 1 JANUARY 2018

Based on the criteria for Recognized Tankstorage Companies of NOFOTA and the results of the audits and the recommendations of the Audit Committee the following tankstorage companies are recognized by NOFOTA.

- 1. Botlek Tank Terminal B.V.**
Montrealweg 151, 3197 KH ROTTERDAM / BOTLEK
Havennummer 4260
P.O. Box 645, 3190 AN HOOGVLIET,

Fax: +31-(0)20-5818181

E-mail: nofota@westway.com

CRITERIA FOR A NOFOTA RECOGNIZED SUPERINTENDENT COMPANY PER JANUARY 2018

Independence

1. The superintendent company shall not be engaged in any way in the trade of products typical the domain of NOFOTA and guarantees to operate fully independently from any other company in executing its activities under the NOFOTA Trading Rules. In case of one or more sister companies with other activities in the domain of NOFOTA (e.g. laboratory), these companies shall operate fully independently from the superintendence activities.

General conditions/Insurance

2. All activities of the superintendent company shall be subject to its general conditions valid on the date of the activity and deposited either with the relevant District Court or with the relevant Chamber of Commerce.
3. The superintendent company shall cover its Liability Insurance with first class underwriters as appropriate to the services performed.

Operational/technical

4. The superintendent company shall operate professionally in executing its activities within the trade of products typical the domain of NOFOTA. Subject to the Principal's agreement, sub-contracting shall only be allowed to another NOFOTA recognized superintendent company.
5. The superintendent company shall comply with the "FOSFA Code of Practice for Member Superintendents" (latest version), the ISO 5555:2001 for sampling of animal and vegetable oils and fats and with the applicable legal requirements
6. The superintendent company shall have relevant knowledge of the NOFOTA Trading Rules as well as of relevant local and international law and regulations.
7. The superintendent company shall be capable of offering a 24-hours service including Saturdays, Sundays and Public Holidays.

Certification

8. The superintendent company shall be certified for all its operations in accordance with the latest relevant ISO standard or equivalent.
This implies that the superintendent company shall operate with fully qualified staff and/or contractors at the highest standard customary in the country of operation and provide structural training facilities to its staff members for continuous improvement of its level of service and

operations.

Application/duration/extension

9. A superintendent company applying for NOFOTA recognition shall be a member of the Association.
10. NOFOTA recognition shall be subject to an audit by a committee (excluding representatives of the superintendent companies) to be appointed by the NOFOTA Technical committee and will be granted upon proposal of the Technical committee by the NOFOTA Council for a 3 year period.
11. If prior to the end of the third respectively each following year no new audit is deemed necessary by the NOFOTA Technical committee, they will propose to the NOFOTA Council to automatically extend the recognition for another year. The NOFOTA Council will decide upon this proposal.
12. The recognition may be withdrawn at any time by the NOFOTA Council at its discretion.

Liability

13. Any liability of NOFOTA for or resulting from the (non-) recognition of a superintendent company is excluded.

RECOGNIZED SUPERINTENDENT COMPANIES AS PER 1 JANUARY 2018

Based on the criteria for Recognized Superintendent Companies of NOFOTA and the results of the audits and the recommendations of the Audit Committee, the following superintendent companies are recognized by NOFOTA.

1. Dr. Buschmeyer B.V.

Jan van Galenstraat 41, 3115 JG SCHIEDAM

E-mail: agri.saynl@corelab.com

CRITERIA FOR A NOFOTA RECOGNIZED LABORATORY PER JANUARY 2018

Independence

1. The laboratory shall not be engaged in any way in the trade of products typical the domain of NOFOTA and guarantees to operate fully independently from any other company in executing its activities under the NOFOTA Trading Rules.
In case of one or more sister companies with other activities in the domain of NOFOTA (e.g. super intence), these companies shall operate fully independently from the laboratory activities.

General conditions/Insurance

2. All activities of the laboratory shall be subject to its general conditions valid on the date of the activity and deposited either with the relevant District Court or with the relevant Chamber of Commerce.
3. The laboratory shall cover its liability Insurance with first class underwriters as appropriate to the services performed.

Operational/technical

4. The laboratory shall operate professionally in executing its activities within the trade of products typical the domain of NOFOTA. Analyses for which instructions have been given by a client shall be made by the laboratory instructed. Subject to the Principal's agreement subcontracting of standard analysis shall only be allowed to another NOFOTA recognized laboratory.
5. The laboratory shall have relevant knowledge of the NOFOTA Trading Rules as well as of relevant local and international law and regulations.
6. Methods of analyses shall be documented and valid.
If analyses are done in connection with the NOFOTA Trading Rules or any contract incorporating NOFOTA Arbitration, the laboratories shall use the NOFOTA Standards of Analyses. If no NOFOTA Standard of Analyses is available, the laboratory at least shall demonstrate that the method of analysis is suitable to determine the desired analyses or properties in a reliable and accurate way (including method validation and accreditation).
7. The laboratory shall have all necessary equipment to perform the analyses as mentioned under item 6.
Equipment shall be appropriate, correctly sited, adequately maintained and calibrated on a regular basis in accordance with good operational practice.
Any equipment deficiency or failure shall be recorded and reported, so that appropriate corrective action can be taken.
8. When primary reference standards are not available, the laboratory can develop and perform tests

and assays on a control sample to establish it as suitable for an intended analysis. Care shall be exercised with the package, storage & handling of the reference materials to prevent deterioration.

9. Control of purified water, reagents and volumetric glassware used in testing is essential to obtain reliable and accurate results. Chemical reagents, solvents and gases shall be of reagent grade. All reagent containers shall bear the original label, or, as a minimum the name of the reagent, date of receipt or preparation, strength, shelf life and preparer.
- 10a. Samples shall be registered in such a way that they are easily traceable. Contractual samples shall be properly labelled and sealed. Labels shall bear the relevant information for identification of the sample. This information shall be clearly legible and indelible.
- 10b. Before starting analysis the laboratory shall check that samples received are suitable to perform the required analysis.
- 10c. Reporting of the analysis results to the client shall be done in writing (by means of an original certificate of the laboratory with an authorized signature) within a reasonable time.

Certification and Quality Assurance

11. The laboratory shall be certified for its general operations in accordance with the latest version of ISO 17025.

This implies:

- that the laboratory shall operate with fully qualified staff at the highest standard customary in the country of operation and provide structural training facilities to its staff members for continuous improvement of its level of service and operations.
- that, in order to ensure a high quality of the analytical results, laboratories shall set up sufficiently effective control systems. Where appropriate the results of line controls shall be noted on control charts and a corrective action procedure shall be implemented for non-conforming analyses results.
- that procedures shall be documented, effective and in place. Each laboratory operating under a quality assurance system shall have a manual that documents standard operating procedures. The manual shall contain written documents that identify the organisation, objectives, functional activities and specific quality assurance activities designed to achieve the quality goals desired for the operation of the laboratory.
- that the laboratory shall periodically conduct internal audits including reproducibility tests to verify that tests and analyses continually comply with the requirements of the quality system.
- All documents and records have to be stored and retained properly, for an agreed period, to prevent damage and /or loss.

Types of recognition/application/duration/extension

12. The NOFOTA recognition scheme for laboratories consists of a standard recognition, relating to the standard contractual analyses such as: FFA, moisture, impurities, phosphorus, sediment, colour,

titre, saponifiability, flash point and density (conventional mass per volume – “liter weight in air”).

13. A laboratory applying for and operating under NOFOTA recognition shall be a member of the Association.
14. The laboratory shall participate in the yearly organized ring test. In order to judge laboratories on their correctness and repeatability in standard and specific analyses, NOFOTA has decided to align to the yearly FOSFA Proficiency Test for the Oils and Fats section, under the condition that the results of the Proficiency Test for the NOFOTA laboratories are made available to NOFOTA. NOFOTA can decide to replace the aforementioned yearly ring test by a blind ring test or an additional ring test organized by NOFOTA.

NOFOTA can decide to replace the aforementioned yearly blind ring test by the blind ring test organized by FOSFA under the condition that the results of this ring test shall be made available to NOFOTA.

15. NOFOTA recognition shall be subject to an audit by a committee (excluding representatives of the laboratories) to be appointed by the NOFOTA Technical committee and will be granted upon proposal of the Technical committee by the NOFOTA Council for a 3 year period.
16. If prior to the end of the third respectively each following year no new audit is deemed necessary by the NOFOTA Technical committee, they will propose to the NOFOTA Council to automatically extend the recognition for another year .The NOFOTA Council will decide upon this proposal.
17. The recognition may be withdrawn at any time by the NOFOTA Council at its discretion.

Liability

18. Any liability of NOFOTA for or resulting from the (non-) recognition of a laboratory is excluded.

STANDARDS OF ANALYSIS AS PER JANUARY 2018

The Standards of Analysis of NOFOTA are aligned to the “FOSFA Mandatory Contractual Analysis Methods for Full Analyst Members: Oils, Fats, Technical Tallows and Greases” latest version, applicable on the date of the activity.

TEST NO	DETERMINATION	METHOD OF ANALYSIS
1	Determination of Lovibond colour	ISO 15305:1998
2	Flashpoint limit test using Pensky-Martens closed cup flash tester	ISO 15267:1998
3	Determination of free fatty acid content	ISO 660:2009
4	Determination of insoluble impurities content	ISO 663:2017
5	Determination of iodine value	ISO 3961:2013
6	Determination of conventional mass per volume (litre weight in air)	ISO 6883:2017
7	Determination of melting point in open capillary tubes (slip point)	ISO 6321:2002
8	Determination of moisture and volatile matter content	ISO 662:1998
9	Determination of peroxide value — Iodometric (visual) endpoint determination	ISO 3960:2017
10	Determination of acid value and acidity	ISO 660:2009
11	Determination of ash	ISO 6884:2008
12	Determination of carotene in vegetable oils	ISO 17932:2011
13	Cold Test	AOCS Cc 11-53 2009
14	Determination of sea water contamination in oils	FOSFA Method:2010
15	Determination of copper. Colorimetric method (Reference method)	BS 684-2.16:1976
16	Determination of erucic acid content (Total C22 monoenes)	ISO 12966-4: 2015
17	Determination of visible foots in crude fats and oils	ISO 19219:2002
18	Preparation of methyl esters of fatty acids	ISO 12966-2:2011 or ISO 12966-3:2016
19	Analysis by gas chromatography of methyl esters of fatty acids	ISO 12966-4: 2015
20	Determination of iron. Colorimetric method (Reference method)	BS 684-2.17:1976
21	Determination of Chlorophyll Pigments in Crude Vegetable Oils	AOCS Cc 13i-96 2009
22	Determination of phosphorus content — Part 1: Colorimetric method (Reference method)	ISO 10540-1:2003
23	Determination of refractive index	ISO 6320:2000/ Cor 1:2006
24	Determination of saponification value	ISO 3657:2013
25	Determination of alkalinity	ISO 10539:2002

TEST NO	DETERMINATION	METHOD OF ANALYSIS
26	Determination of ultraviolet absorbance expressed as specific UV extinction	ISO 3656:2011
27	Calculation of total fatty matter	BS 684-2.4:1976
28	Determination of unsaponifiable matter — Method using diethyl ether extraction (Reference method)	ISO 3596:2000
29	Determination of water content — Entrainment method	ISO 934:1980
30	Determination of water content — Karl Fischer method (pyridine free)	ISO 8534:2017
31	Determination of bleachability a. General Case	BS 684-2.27:1987
32	Determination of bleachability b. Bleach Test for Palm Oil	BS 684-2.27:1987
33	Determination of cadmium content by direct graphite furnace atomic absorption spectrometry	ISO 15774:2000
34	Determination of cloud point	BS 684-1.5:1987/ Amd:1989
35	Color - FAC Standard Color	AOCS Cc 13a-43 2009
36	Color - Wesson Method Using Color Glasses Calibrated in Accordance with the AOCS-Tintometer Color Scale	AOCS Cc 13b-45 2009
37	Color - Gardner 1963 (Glass Standards)	AOCS Td 1a-64 2009
38	Determination of copper, iron and nickel contents — Graphite furnace atomic absorption method	ISO 8294:1994
39	Evaluation of technical tallows and animal greases	BS 3919:1987/ Amd:1989
40	Determination of oxidized fatty acids	BS 684-2.12:1984
41	Determination of oxidative stability (accelerated oxidation test) Rancimat or equivalent	ISO 6886:2006
42	Determination of phosphorus content — Part 2: Method using graphite furnace atomic absorption spectrometry	ISO 10540-2:2003
43	Determination of phosphorus content — Part 3: Method using inductively coupled plasma (ICP) optical emission spectroscopy	ISO 10540-3:2002
44	Determination of content of polar compounds	ISO 8420:2002/ Cor 1:2004
45	Phosphoric acid test	ISO 150:2006
46	Determination of polyethylene-type polymers	ISO 6656:2002
47	Refined and Bleached Colour	AOCS Cc 8d-55 2009
48	Determination of smoke point	BS 684-1.8:1976
49	Determination of solid fat content by pulsed NMR — Part 1: Direct method	ISO 8292-1:2008

TEST NO	DETERMINATION	METHOD OF ANALYSIS
50	Determination of solid fat content by pulsed NMR — Part 2: Indirect method	ISO 8292-2:2008
51	Determination of individual and total sterols contents — Gas chromatographic method	ISO 12228-1/2:2014
52	Determination of titre	ISO 935:1988
53	Determination of lead by direct graphite furnace atomic absorption spectroscopy	ISO 12193:2004
54	Determination of unsaponifiable matter — Method using hexane extraction (for Sheanut Oil only)	ISO 18609:2000
55	Determination of sediment in crude fats and oils — Centrifuge method	ISO 15301:2001/ Cor 1:2007
56	Determination of benzo[a]pyrene — Reverse-phase high performance liquid chromatography method	ISO 15302:2007
57	Determination of the deterioration of bleachability index (DOBI)	ISO 17932:2011
58	Determination of anisidine value	ISO 6885:2006
59	Determination of the composition of fatty acids in the 2-position of the triglyceride molecules	ISO 6800:1997
60	Determination of residual technical hexane content	ISO 9832:2002
61	Determination of mineral acidity	BS 684-2.48:1998
62	Determination of water-insoluble solvents	BS 684-1.9:1976
63	Detection and identification of a volatile organic contaminant by GC/MS	ISO 15303:2001
64	Determination of stigmastadienes in vegetable oils — Part 1: Method using capillary-column gas chromatography (Reference method).	ISO 15788-1:1999
65	Determination of aliphatic hydrocarbons in vegetable oils	ISO 17780:2015
66	Determination of Lovibond® colour – Automatic method	ISO 27608:2010
67	Determination of PAH by on-line DACC and HPLC with FLU	ISO 22959:2009
68	Determination of conventional mass per volume (litre weight in air) – Oscillating U-tube method	ISO 18301:2014

LIST OF CIRCULAR LETTERS 2017

No.	Date	Subject
1	25-01-2017	Information regarding registration for the AGM and Annual Dinner, Arbitrators Workshop and NTR Seminar.
2	17-08-2017	New members and non-business days.
3	14-12-2017	Information on members, committees, centennial book, events and non-business days 2018.
