## GENERAL

### Register of members

During 2015, 1 A-member and 2 B-members gave notice of ending their membership.

New members: 1 B-member and 4 C-members were admitted during 2015.

The list of members as per 1st January 2015, contains:

<u>01-01-2015</u>		<u>01-01-2016</u>
8	A-members	9
84	B-members	83
42	C-members	46
----		----
134		138

and is listed in this report.

### Council

At the beginning of 2015 the Council consisted of Messrs:

J.H. Neet	(President)	(brokers)
M. Osseweijer	(Past-President)	(industry)
D. Stregels	(Vice-President)	(industry)
A. Keemink		(industry)
vacancy		(trade)
M. Farrow		(FOSFA representative)
L. Favre		(tropical oils refiners)
vacancy		(meat trade)
E. Schimmel		(shippers)
F.H.C. Jansen		(industry)
R. van Noord		(Secretary General)

At the end of the year the Council consisted of the following members:

D. Stregels	(President)	(industry)
J.H. Neet	(Past-President)	(brokers)
R. van der Graaf	(Vice-President)	(trade)
A. Keemink		(industry)
A. Toorman		(industry)
M. Reis		(FOSFA representative)
H. Omvlee		(tropical oils refiners)
vacancy		(meat trade)
E. Schimmel		(shippers)
F.H.C. Jansen		(industry)
R. van Noord		(Secretary General)

## **Meetings**

The Annual General Meeting of members, the meeting of arbitrators and the Annual Dinner were held on 16th of April 2015.

The Council met on 12 February, 16 April and 17 September.

## **Representation within FOSFA**

In the FOSFA Council Mr. D. Stregels acted as NOFOTA representative.

During 2015, the following members served on the Section Committees of FOSFA:

Oil Seeds Section	-	J.H. Neet
Oils and Fats Section	-	R. van der Graaf

On behalf of NOFOTA;

- F. Out serves on the Technical Committee of FOSFA.
- S. Oudshoorn represents NOFOTA in the Contracts Committee of FOSFA.
- S.M. Kosorog acts as NOFOTA representative in the Arbitration and Appeal Committee of FOSFA.

## **Financial Committee**

The Financial Committee for 2015 consisted of messrs. M. Staal, J. van Zijst and H. Pronk.

## **Arbitration**

In 2015 the Committee of Appointment for the Oils, Fats and Allied Products Division consisted of Messrs:

G. Neureiter	(Chairman)
E. Schimmel	(Member)
F.H.C. Jansen	(Member)

The Committee of Appointment of the Groundnuts Division consisted in 2015 of Messrs:

J.W. Ort	(Chairman)	H. Jas	(Vice-Chairman)
J.P. van Velzen	(Member)	P.C. Stienen	(Deputy Member)
vacancy	(Member)	vacancy	(Deputy Member)

The Committee of Appointment of the Meat Division consisted in 2015 of Messrs:

- C. Wendt
- T.D. van der Ploeg

Attached to this report are listed:

- the latest list of arbitrators of the Oils, Fats and Allied Products Division including the Meat Division;
- the latest list of appeal arbitrators, drawn up by the Committee of Appointment for the Oils, Fats and Allied Products Division;
- the latest list of arbitrators and appeal arbitrators of the Groundnuts Division.

## **Contract Committee**

During 2015 the Contract Committee agreed to stop the bi-annual changes of the Trading Rules and Rules for Arbitration. The NTR and RA have now been published on the website with an actual version. Previous versions will be archived and available on the website.

The criteria for recognized storage companies, superintendents and laboratories have been revised as per 1 January 2016.

In 2015 the Contract Committee consisted of Messrs:

### **Members**

S. Oudshoorn	(Chairman, industry)
A. Assenberg	(trade)
vacancy	(trade)
C. Huurman	(industry)
vacancy	(brokers)
S. Buisman	(industry)
L. Margaka	(Vice-Chairman, non-food)
W. Grooss	(non-food)
W. Tang	(industry)
H.A.A. Maduro	(representative tankstorage companies)
O. Smit	(representative superintendent companies)
E. Veenstra	(representative Ucogras)
Chr. Buchholz	(agenda member GROFOR)

During the year 2015 the Contract Committee met on the 14th of April and 6th of October.

### **List of contracts and arbitrations clauses**

A summary of all Contracts issued by the Association is listed in the relative annex to this report.

## Technical Committee

Ringtesting of test methods and technical matters remained the domain of the Technical Committee. According to the criteria for recognized laboratories, NOFOTA decided to align to the Proficiency Test organized by FOSFA for 2015.

The FOSFA Proficiency Test P82 was reviewed during the 2015 meetings. A Petit Comite have visited all NOFOTA laboratories to audit the method used for the Lovibond Red test.

The list with standard analyses methods published in the NTR have been updated.

The criteria for tank storage recognition have been revised, particularly on the point of certification. Reference is now specifically made to ISO 9001 certification in combination with HACCP or ISO22000.

The Technical Committee further organized various audits for the recognition of tankstorage companies, superintendent companies and laboratories, according the 2015 audit scheme.

The latest NOFOTA-standards of analysis are annexed to this report.

The Technical Committee consisted in 2015 of:

F. Out	(Chairman)
J. Meijdam	(Vice-Chairman)
T. Eigenraam	(member)
Mrs. Lippens	(member)
M. Frijmuth (replaced end of 2015 by D. el Boudouhi)	(member)
B. Klunder (replaced end of 2015 by R. van Kempen)	(trade)
A. Overmars	(member)
J. Hancock	(representative FOSFA)
A. Van Veen	(member)
F. Out	(member)
R. van Gelder	(member)
A. Coenradie	(member)

### B(technical/laboratory)-members

Ph. Bastijns	(laboratories)
M.H.F. Verhoeff	(laboratories)
A.P.M. Janssens	(laboratories)
H. Janssens	(laboratories)
M. Bruggeman	(laboratories)
J.N. van der Moolen	(laboratories)
R. Flokstra	(superintendents)

The criteria for recognized tankstorage companies became effective in 1997 and were adjusted in the Trading Rules by end 2015. A copy of the current version (per 1-1-2016) is attached to this report. Based on these criteria 9 tankstorage companies have a recognition in 2015. A list of the recognized tankstorage companies as per January 2016 is annexed to this report.

The criteria for recognized superintendent companies became effective in 1997. A copy of the current criteria is attached to this report. Based on these criteria 10 superintendent companies have been recognized by NOFOTA. A list of the recognized superintendent companies as per January 2016 is annexed to this report.

The six recognized laboratories were in 2015 aligned to the FOSFA Collaborative Test P82 and all passed. The laboratories also were - as far as required - visited by members of the Committee, after which they kept their recognition as NOFOTA laboratory. Six laboratories have an additional recognition for BAP analysis. The list of the recognized laboratories as per January 2016 is annexed to this report.

The Technical Committee met on 30 March and 20 November 2015.

## **Cooperation with Kindred Associations**

The cooperation with our kindred associations, FOSFA, Associazione Granaria di Milano, GROFOR and UCOGRAS, continued. As far as possible the President of NOFOTA has attended the Council meetings of FOSFA International. Furthermore, we have accepted invitations to attend the annual dinners of the various associations.

## **Circular letters**

A list of circular letters to members issued by the Association in 2015 is appended to this report.

## GUIDELINES FOR THE FORMATION OF THE COUNCIL

1. In case the Council consists of 10 members the following categories should preferably be represented:

shippers	-	1
dealers	-	1
brokers	-	1
industry crush/refining	-	2
industry consumer	-	1
Industry tropical oils/refiners	-	1
Industry oleochemical/bio diesel	-	1
meat trade	-	1
groundnut division	-	1

2. Kindred Associations, being a member-A, may appoint their President to the Council, after obtaining prior approval of the Council.

3. Members of the Council must resign after a period of 8 years and may only be re-elected after a period of 2 years. For members of the Executive Council, the election period terminates after a full service.

4. Preferably, the President will be elected for a period of 2 years alternating from the list of industrial members and other categories with the exception of those mentioned under 2.

5. Preferably, the Vice-President will be elected for 2 years and directly succeed the President for the subsequent 2 years.

6. The outgoing President will preferably be nominated as 3rd member of the Executive Council for 2 years.

7. Council members who, for any reason, resign during their appointment, may propose a successor from the same category. The elected successor starts a new two years election period with a maximum of 8 years.

## ORDER OF ROTATION OF THE COUNCIL

### Order of Rotation of Council members

April 2016	E. Schimmel	re-eligible

	Mrs. A. Keemink	re-eligible
	H. Omvlee	re-eligible
	R. van der Graaf	re-eligible
	A. Toorman	re-eligible
	D. Stregels	re-eligible
	J.H. Neet	not re-eligible
April 2018	E. Schimmel	re-eligible
April 2019	F.H.C. Jansen	not re-eligible
	Mrs. A. Keemink	re-eligible
	H. Omvlee	re-eligible
	R. van der Graaf	re-eligible
	A. Toorman	re-eligible
	D. Stregels	re-eligible
April 2020	E. Schimmel	not re-eligible
April 2021	Mrs. A. Keemink	re-eligible
	D. Stregels	re-eligible
	R. van der Graaf	re-eligible
	H. Omvlee	re-eligible
	A. Toorman	re-eligible

## GUIDELINES FOR QUALIFICATION AS (APPEAL) ARBITRATOR

1. Being active in the trade/industry.
2. Being minimum 30 years of age.
3. Having at least 8 years of experience in a qualified position.
4. Being a member or being employed by a member, or having been appointed by a member-A, or having been coopted by the Council.
5. Retirement as arbitrator three years after retirement from the trade/industry or at 65, whichever is the earlier.
6. After having been arbitrator in three arbitrations, an arbitrator can become an appeal arbitrator too.
7. Prospective arbitrators will first follow at least one arbitration as an observer.

## LIST OF ARBITRAL AWARDS 2015

In the year under review 3 arbitration proceedings were applied for and in one case a foreign party was concerned. One of the arbitrations concerned a dispute under a Meat contract. One arbitration concerned an appeal arbitration.

During 2015, 3 arbitral awards were issued.

## OILS, FATS AND ALLIED PRODUCTS DIVISION

### List of arbitrators as per January 2016

Arbitrators with an "M" behind their names are exclusively or also casings and/or meat Experts, arbitrators with an "A" are also appeal arbitrator.

# CRITERIA FOR A NOFOTA RECOGNIZED TANKSTORAGE COMPANY PER JANUARY 2016

## Independence

1. The tank storage company shall not be engaged in any way in the trade of products typical the domain of NOFOTA and guarantees to operate fully independently from any other company in fulfilling its obligations under the NOFOTA Trading Rules.

## Financial situation

2. The tank storage company's warrants, delivery orders and approved releases shall be those reproduced in the NOFOTA Trading Rules, latest edition. Its warrants and delivery orders shall be acceptable to a first class commercial bank as negotiable documents.

## General conditions/Insurance

- 3a. All activities of the tank storage company shall be subject to its general conditions valid on the date of the activity and deposited either with the relevant District Court or with the relevant Chamber of Commerce.
- 3b. The tank storage company shall cover its liability insurance with first class underwriters as appropriate to the services performed.

## Administration

- 4a. The tank storage company shall be equipped to render the contractual administrative assistance to the trade as provided in the current edition of the NOFOTA Trading Rules. This includes the availability of an administrative batch tracking and tracing system enabling its principals and cargo-owners/-receivers to retrieve the full history of their cargoes from the moment these were brought under the custody of the tank storage company.
- 4b. The tank storage company shall have facilities to allow for administrative work in connection with requirements from fiscal authorities, including financial security with those authorities.

## Operational/technical

- 5a. All materials and equipment (tanks, lines, pipes, pumps and valves, including sampling apparatus etc.) shall be suitable for the safe storage and handling of the product in accordance with the "Hygienecode voor op- en overslag van eetbare oliën en vetten" (Hygiene code for storage and handling of edible oils and fats), latest version VOTOB, or equivalent for those installations outside The Netherlands, applicable on the date of the activity.
- 5b. The previous cargoes in the tanks, lines and pump systems used for storage and handling of the oils at the tank storage company shall have been a product in accordance with the E.U. Commission regulation 579/2014 or any successive Directive in force at the time of the actual storage of the goods; all materials and equipment (tanks, lines, pipes, pumps and valves, including sampling apparatus etc.) used for storage and handling of other products shall be completely separated.
- 5c. Tanks shall be equipped in such a way that they can be cleaned properly and that, if required, the product can be heated adequately by a proper temperature control system.
- 5d. Technical equipment and operational procedures shall be such as to preserve the good merchantable quality of the product and to prevent contamination. Thermal heating oils shall not be used.
- 5e. The tank storage company shall have available officially gauged/calibrated facilities for establishing quantity and shall offer adequate sampling facilities.

## **Certification**

6. The tank storage company shall be certified for its operations in accordance with ISO 9001 in combination with HACCP or ISO 9001 in combination with ISO22000. This implies that the tank storage company shall operate with fully qualified staff and/or contractors at the highest standard customary in the country of operation and provide structural training facilities to its staff members for continuous improvement of its level of service and operations.

## **Application/duration/extension**

- 7a. A tank storage company applying for NOFOTA recognition shall be a member of the Association.
- 7b. NOFOTA recognition shall be subject to an audit by a committee (excluding representatives of the tank storage companies) to be appointed by the NOFOTA Technical committee and will be granted recognition upon proposal of the Technical committee by the NOFOTA Council for a 3 year period.
- 7c. If prior to the end of the third respectively each following year no new audit is deemed necessary by the NOFOTA Technical committee, they will propose to the NOFOTA Council to automatically extend the recognition for another year. The NOFOTA Council will decide upon this proposal.
- 7d. The recognition may be withdrawn at any time by the NOFOTA Council at its discretion. The recognition remains in place for all parcels stored prior to the date of withdrawal. Parcels stored after the withdrawal has been published to the members are no longer subject to recognition.

## **Liability**

8. Any liability of NOFOTA for or resulting from the (non-) recognition of a tank storage company is excluded.

## RECOGNIZED TANKSTORAGE COMPANIES AS PER 1 JANUARY 2016

# CRITERIA FOR A NOFOTA RECOGNIZED SUPERINTENDENT COMPANY PER JANUARY 2016

## Independence

1. The superintendent company shall not be engaged in any way in the trade of products typical the domain of NOFOTA and guarantees to operate fully independently from any other company in executing its activities under the NOFOTA Trading Rules. In case of one or more sister companies with other activities in the domain of NOFOTA (e.g. laboratory) these companies shall operate fully independently from the superintendence activities.

## General conditions/Insurance

2. All activities of the superintendent company shall be subject to its general conditions valid on the date of the activity and deposited either with the relevant District Court or with the relevant Chamber of Commerce.
3. The superintendent company shall cover its Liability Insurance with first class underwriters as appropriate to the services performed.

## Operational/technical

4. The superintendent company shall operate professionally in executing its activities within the trade of products typical the domain of NOFOTA. Subject to the Principal's agreement, sub-contracting shall only be allowed to another NOFOTA recognized superintendent company.
5. The superintendent company shall comply with the "FOSFA Code of Practice for Member Superintendents" (latest version), the ISO 5555:2001 for sampling of animal and vegetable oils and fats and with the applicable legal requirements
6. The superintendent company shall have relevant knowledge of the NOFOTA Trading Rules as well as of relevant local and international law and regulations.
7. The superintendent company shall be capable of offering a 24-hours service including Saturdays, Sundays and Public Holidays.

## Certification

8. The superintendent company shall be certified for all its operations in accordance with the latest relevant ISO standard or equivalent. This implies that the superintendent company shall operate with fully qualified staff and/or contractors at the highest standard customary in the country of operation and provide structural training facilities to its staff members for continuous improvement of its level of service and operations.

## Application/duration/extension

9. A superintendent company applying for NOFOTA recognition shall be a member of the Association.
10. NOFOTA recognition shall be subject to an audit by a committee (excluding representatives of the superintendent companies) to be appointed by the NOFOTA Technical committee and will be granted upon proposal of the Technical committee by the NOFOTA Council for a 3 year period.
11. If prior to the end of the third respectively each following year no new audit is deemed necessary by the NOFOTA Technical committee, they will propose to the NOFOTA Council to automatically extend the recognition for another year. The NOFOTA Council will decide upon this proposal.
12. The recognition may be withdrawn at any time by the NOFOTA Council at its discretion.

## Liability

13. Any liability of NOFOTA for or resulting from the (non-) recognition of a superintendent company is excluded.

## RECOGNIZED SUPERINTENDENT COMPANIES AS PER 1 JANUARY 2016

# CRITERIA FOR A NOFOTA RECOGNIZED LABORATORY PER JANUARY 2016

## Independence

1. The laboratory shall not be engaged in any way in the trade of products typical the domain of NOFOTA and guarantees to operate fully independently from any other company in executing its activities under the NOFOTA Trading Rules. In case of one or more sister companies with other activities in the domain of NOFOTA (e.g. superintendence), these companies shall operate fully independently from the laboratory activities.

## General conditions/Insurance

2. All activities of the laboratory shall be subject to its general conditions valid on the date of the activity and deposited either with the relevant District Court or with the relevant Chamber of Commerce.
3. The laboratory shall cover its liability Insurance with first class underwriters as appropriate to the services performed.

## Operational/technical

4. The laboratory shall operate professionally in executing its activities within the trade of products typical the domain of NOFOTA. Analyses for which instructions have been given by a client shall be made by the laboratory instructed. Subject to the Principal's agreement subcontracting of standard analysis shall only be allowed to another NOFOTA recognized laboratory.
5. The laboratory shall have relevant knowledge of the NOFOTA Trading Rules as well as of relevant local and international law and regulations.
6. Methods of analyses shall be documented and valid. If analyses are done in connection with the NOFOTA Trading Rules or any contract incorporating NOFOTA Arbitration, the laboratories shall use the NOFOTA Standards of Analyses. If no NOFOTA Standard of Analyses is available, the laboratory at least shall demonstrate that the method of analysis is suitable to determine the desired analyses or properties in a reliable and accurate way (including method validation and accreditation).
7. The laboratory shall have all necessary equipment to perform the analyses as mentioned under item 6. Equipment shall be appropriate, correctly sited, adequately maintained and calibrated on a regular basis in accordance with good operational practice. Any equipment deficiency or failure shall be recorded and reported, so that appropriate corrective action can be taken.
8. When primary reference standards are not available, the laboratory can develop and perform tests and assays on a control sample to establish it as suitable for an intended analysis. Care shall be exercised with the package, storage & handling of the reference materials to prevent deterioration.
9. Control of purified water, reagents and volumetric glassware used in testing is essential to obtain reliable and accurate results. Chemical reagents, solvents and gases shall be of reagent grade. All reagent containers shall bear the original label, or, as a minimum the name of the reagent, date of receipt or preparation, strength, shelf life and preparer.
- 10a. Samples shall be registered in such a way that they are easily traceable. Contractual samples shall be properly labelled and sealed. Labels shall bear the relevant information for identification of the sample. This information shall be clearly legible and indelible.
- 10b. Before starting analysis the laboratory shall check that samples received are suitable to perform the required analysis.
- 10c. Reporting of the analysis results to the client shall be done in writing (by means of an original certificate of the laboratory with an authorized signature) within a reasonable time.

## Certification and Quality Assurance

11. The laboratory shall be certified for its general operations in accordance with the latest version of ISO 17025.

This implies:

- that the laboratory shall operate with fully qualified staff at the highest standard customary in the country of operation and provide structural training facilities to its staff members for continuous improvement of its level of service and operations.
- that, in order to ensure a high quality of the analytical results, laboratories shall set up sufficiently effective control systems. Where appropriate the results of line controls shall be noted on control charts and a corrective action procedure shall be implemented for non-conforming analyses results.
- that procedures shall be documented, effective and in place. Each laboratory operating under a quality assurance system shall have a manual that documents standard operating procedures. The manual shall contain written documents that identify the organisation, objectives, functional activities and specific quality assurance activities designed to achieve the quality goals desired for the operation of the laboratory.
- that the laboratory shall periodically conduct internal audits including reproducibility tests to verify that tests and analyses continually comply with the requirements of the quality system.
- All documents and records have to be stored and retained properly, for an agreed period, to prevent damage and /or loss.

#### **Types of recognition/application/duration/extension**

12. The NOFOTA recognition scheme for laboratories consists of a standard recognition, relating to the standard contractual analyses such as: FFA, moisture, impurities, phosphorus, sediment, colour, titre, saponifiability, flash point and density (conventional mass per volume – “liter weight in air”).
13. A laboratory applying for and operating under NOFOTA recognition shall be a member of the Association.
14. The laboratory shall participate in the yearly organized ring test. In order to judge laboratories on their correctness and repeatability in standard and specific analyses, NOFOTA has decided to align to the yearly FOSFA Proficiency Test for the Oils and Fats section, under the condition that the results of the Proficiency Test for the NOFOTA laboratories are made available to NOFOTA. NOFOTA can decide to replace the aforementioned yearly ring test by a blind ring test or an additional ring test organized by NOFOTA.  
  
NOFOTA can decide to replace the aforementioned yearly blind ring test by the blind ring test organized by FOSFA under the condition that the results of this ring test shall be made available to NOFOTA.
15. NOFOTA recognition shall be subject to an audit by a committee (excluding representatives of the laboratories) to be appointed by the NOFOTA Technical committee and will be granted upon proposal of the Technical committee by the NOFOTA Council for a 3 year period.
16. If prior to the end of the third respectively each following year no new audit is deemed necessary by the NOFOTA Technical committee, they will propose to the NOFOTA Council to automatically extend the recognition for another year. The NOFOTA Council will decide upon this proposal.
17. The recognition may be withdrawn at any time by the NOFOTA Council at its discretion.

#### **Liability**

18. Any liability of NOFOTA for or resulting from the (non-) recognition of a laboratory is excluded.

## RECOGNIZED LABORATORIES AS PER 1 JANUARY 2016

## STANDARDS OF ANALYSIS AS PER JANUARY 2016

The Standards of Analysis of NOFOTA are aligned to the "FOSFA Mandatory Contractual Analysis Methods for Full Analyst Members: Oils, Fats, Technical Tallows and Greases" latest version, applicable on the date of the activity.

TEST NO	DETERMINATION	METHOD OF ANALYSIS
1	Determination of Lovibond colour	ISO 15305:1998
2	Flashpoint limit test using Pensky-Martens closed cup flash tester	ISO 15267:1998
3	Determination of free fatty acid content	ISO 660:2009
4	Determination of insoluble impurities content	ISO 663:2007
5	Determination of iodine value	ISO 3961:2013
6	Determination of conventional mass per volume (litre weight in air)	ISO 6883:2007
7	Determination of melting point in open capillary tubes (slip point)	ISO 6321:2002
8	Determination of moisture and volatile matter content	ISO 662:1998
9	Determination of peroxide value — Iodometric (visual) endpoint determination	ISO 3960:2007
10	Determination of acid value and acidity	ISO 660:2009
11	Determination of ash	ISO 6884:2008
12	Determination of carotene in vegetable oils	ISO 17932:2011
13	Cold Test	AOCS Cc 11-53 2009
14	Determination of sea water contamination in oils	FOSFA Method:2010
15	Determination of copper. Colorimetric method (Reference method)	BS 684-2.16:1976
16	Determination of erucic acid content (Total C22 monoenes)	ISO 12966-4: 2015
17	Determination of visible foots in crude fats and oils	ISO 19219:2002
18	Preparation of methyl esters of fatty acids	ISO 12966-2:2011 or ISO 12966-3:2009
19	Analysis by gas chromatography of methyl esters of fatty acids	ISO 12966-4: 2015
20	Determination of iron. Colorimetric method (Reference method)	BS 684-2.17:1976
21	Determination of Chlorophyll Pigments in Crude Vegetable Oils	AOCS Cc 13i-96 2009
22	Determination of phosphorus content — Part 1: Colorimetric method (Reference method)	ISO 10540-1:2003
23	Determination of refractive index	ISO 6320:2000/ Cor 1:2006
24	Determination of saponification value	ISO 3657:2013
25	Determination of alkalinity	ISO 10539:2002
26	Determination of ultraviolet absorbance expressed as specific UV extinction	ISO 3656:2011
27	Calculation of total fatty matter	BS 684-2.4:1976
28	Determination of unsaponifiable matter — Method using diethyl ether extraction (Reference method)	ISO 3596:2000
29	Determination of water content — Entrainment method	ISO 934:1980

30	Determination of water content — Karl Fischer method (pyridine free)	ISO 8534:2008
31	Determination of bleachability a. General Case	BS 684-2.27:1987
32	Determination of bleachability b. Bleach Test for Palm Oil	BS 684-2.27:1987
33	Determination of cadmium content by direct graphite furnace atomic absorption spectrometry	ISO 15774:2000
34	Determination of cloud point	BS 684-1.5:1987/ Amd:1989
35	Color - FAC Standard Color	AOCS Cc 13a-43 2009
36	Color - Wesson Method Using Color Glasses Calibrated in Accordance with the AOCS-Tintometer Color Scale	AOCS Cc 13b-45 2009
37	Color - Gardner 1963 (Glass Standards)	AOCS Td 1a-64 2009
38	Determination of copper, iron and nickel contents — Graphite furnace atomic absorption method	ISO 8294:1994
39	Evaluation of technical tallows and animal greases	BS 3919:1987/ Amd:1989
40	Determination of oxidized fatty acids	BS 684-2.12:1984
41	Determination of oxidative stability (accelerated oxidation test) Rancimat or equivalent	ISO 6886:2006
42	Determination of phosphorus content — Part 2: Method using graphite furnace atomic absorption spectrometry	ISO 10540-2:2003
43	Determination of phosphorus content — Part 3: Method using inductively coupled plasma (ICP) optical emission spectroscopy	ISO 10540-3:2002
44	Determination of content of polar compounds	ISO 8420:2002/ Cor 1:2004
45	Phosphoric acid test	ISO 150:2006
46	Determination of polyethylene-type polymers	ISO 6656:2002
47	Refined and Bleached Colour	AOCS Cc 8d-55 2009
48	Determination of smoke point	BS 684-1.8:1976
49	Determination of solid fat content by pulsed NMR — Part 1: Direct method	ISO 8292-1:2008
50	Determination of solid fat content by pulsed NMR — Part 2: Indirect method	ISO 8292-2:2008
51	Determination of individual and total sterols contents — Gas chromatographic method	ISO 12228-1/2:2014
52	Determination of titre	ISO 935:1988
53	Determination of lead by direct graphite furnace atomic absorption spectroscopy	ISO 12193:2004
54	Determination of unsaponifiable matter — Method using hexane extraction (for Sheanut Oil only)	ISO 18609:2000
55	Determination of sediment in crude fats and oils — Centrifuge method	ISO 15301:2001/ Cor 1:2007
56	Determination of benzo[a]pyrene — Reverse-phase high performance liquid chromatography method	ISO 15302:2007
57	Determination of the deterioration of bleachability index (DOBI)	ISO 17932:2011
58	Determination of anisidine value	ISO 6885:2006

59	Determination of the composition of fatty acids in the 2-position of the triglyceride molecules	ISO 6800:1997
60	Determination of residual technical hexane content	ISO 9832:2002
61	Determination of mineral acidity	BS 684-2.48:1998
62	Determination of water-insoluble solvents	BS 684-1.9:1976
63	Detection and identification of a volatile organic contaminant by GC/MS	ISO 15303:2001
64	Determination of stigmastadienes in vegetable oils — Part 1: Method using capillary-column gas chromatography (Reference method).	ISO 15788-1:1999
65	Determination of aliphatic hydrocarbons in vegetable oils	ISO 17780:2015
66	Determination of Lovibond® colour – Automatic method	ISO 27608:2010
67	Determination of PAH by on-line DACC and HPLC with FLU	ISO 22959:2009
68	Determination of conventional mass per volume (litre weight in air) – Oscillating U-tube method	ISO 18301:2014

## LIST OF CIRCULAR LETTERS 2015

<u>No.</u>	<u>Date</u>	<u>Subject</u>
1.	26-01-2015	Information regarding registration for the AGM and Annual Dinner
2.	9-02-2015	Information on Annual Dinner and Golf
3.	18-12-2015	Information on members, committees, centennial book, etc.
